EDUCATION

The University of Texas at Austin

Certificate in Full Stack Web Development, June 2020 (expected)

The University of Chicago

Bachelor of Arts in Economics with General Honors, June 2014

Bachelor of Science in Mathematics with Specialization in Economics, June 2014

GPA: 3.5/4.0

EXPERIENCE

NERA Economic Consulting, Chicago IL

Analyst, Transfer Pricing (July 2014 – June 2018)

- Developed transfer pricing reports to document client functional analysis, transfer pricing method selection, comparables screening process, comparables financial analysis, and transfer pricing results for international tax compliance purposes
- Analyzed comparable companies' financial statements, implemented accounting and economic adjustments to comparables' financial data, calculated comparables' profitability ratios and arm's length range of returns to benchmark clients' cross-border intercompany transactions against independent third-party transactions
- Implemented residual profit split model to determine arm's length intercompany pricing among multinational group entities performing routine and entrepreneurial functions

The University of Chicago Booth School of Business, Chicago IL

Research Assistant for Professor Matthew Notowidigdo (June 2012 – June 2014)

- Cleaned and managed datasets, run regressions and create graphs explaining the impact of public health insurance on labor supply in Tennessee in Stata
- Performed literature reviews on wealth-health correlation, hospital closures, and emergency departments

Research Assistant for Professor Emily Oster (October 2013 – June 2014)

- Wrote Stata .ado file and accompanying Stata help file to define statistical command (psacalc), proofread paper

US Department of the Interior, Washington DC

Intern, Office of Policy Analysis (August 2013 – September 2013)

- Analyzed economic impact of national parks based on visitation, expenditure, and estimated multiplier data
- Replicated study on the effect of agricultural water deliveries on farm employment using publicly available data
- Simulated effects of possible modifications to calculation of county payments under Interior's Payments in Lieu of Taxes program, created graphs to visually summarize results of different scenarios
